MouseTool is a mouse recorder and a program to control mouse movements. You can record mouse movements while using any program that supports it and can export the recordings to files. Those files are saved in standard format and you can convert them into any other format and save it again. The MouseTool provides a GUI with a recorder, settings and a log file. The settings include a panel to customize the way MouseTool records the mouse clicks, a panel to customize the look of the recorder and the log panel. MouseTool Settings: MouseTool Settings provide an easy to use and practical solution for recording mouse movements. To start recording you need to select the input device (e.g. mouse, trackpad, touchpad or keyboard) and then select the location where you want to save the files. You can decide whether the file path or the filename should be prefixed with a timestamp and you can choose whether to record mouse clicks or not. To disable the recording MouseTool needs to be closed. You can set the various options described below for each of the recording settings. For detailed explanations, please see the sections on each of the buttons on the recording settings. Recording Screen Record the selected screen as a still image The screen recording options are described in more detail in the next section. For now, you can set the following recording settings: Keyboard You can use the keyboard to save mouse cursor movements. You can use any keyboard key to activate the recording. The MouseTool will record mouse cursor movements until you use the corresponding key. The MouseTool will record only the target regions in which you moved your mouse cursor. You can select areas to record by clicking on the borders of the target areas. Mouse MouseTool will record mouse cursor movements. You can use the MouseTool to create the mouse cursor movement log file. The settings in the MouseTool mouse settings are the same as the settings in the MouseTool Settings. You can select areas to record by clicking on the borders of the target areas. Touchpad The MouseTool records the cursor movements on the touchpad with support for horizontal and vertical scrolling. SoftSpire PDF Security Removal allows users to remove security restrictions from PDFs. Comments Product Details PDF documents have steadily, but surely risen in popularity and currently most

casual users employ these files in one way or the other. Even organizations rely on them, as they provide adequate security against various threats. For all those cases when these restrictions need to be removed, SoftSpire PDF Security Removal provides an easy to use and practical solution. Remove restrictions from PDFs The application cannot 'crack' or 'hack' PDFs and all restrictions are removed only upon provision of proper passwords. That being said, once these are inserted, unlocking follows with a simple mouse click on the "Remove PDF Security" button. Indeed new users can modify items with under five mouse clicks, as the application follows a simple 'select source – select destination – unlock' three-step process. The one window setup provides users with a highly streamlined and intuitive experience and any issues can be solved by turning to the step-by-step online manual. Requires user passwords for locked items Any source PDF documents are valid targets for processing, however user passwords will have to be provided for protected items. The application can remove all types of restrictions, including those related to editing, printing or annotating texts. There are no settings to adjust and the only option one can alter before output files are created is the destination folder. Output documents will carry the 'Unlocked' prefix although a nice feature would have been the ability to rename files. On the whole, an adequate utility for basic removal of security locks All things considered, SoftSpire PDF Security Removal is a simple, but practical tool for anyone regularly working with protected PDF files. It allows one to remove restrictions from source documents quickly, including those related to printing and editing. Related Software Web viewer that lets you open, print and save web pages as PDFs.
